Steven Philip Carbullido

Dear Mr. Carbullido:

Pursuant to my authority under 10 GCA § 45103, I am appointing you to serve as a

**MEMBER, BOARD OF DIRECTORS, GUAM ENVIRONMENTAL PROTECTION AGENCY**

Appointing you to this position comes with great responsibility because you will have a vital role to perform which will place many demands on your time and energy. Integrity and honesty are virtues that I prioritize for my Administration to exemplify, and I know that you will do the same while in service to the people of Guam. Your responsibilities shall be significant and consequential. I trust that you will fulfill your duties and set a standard for others to follow.

I appreciate your willingness to serve in this position, and I am confident that your time will be spent in a manner to improve the island of Guam.

This appointment is subject to the advice and consent of *I Liheslaturan Guåhan*. If you have any questions or concerns, please contact the Office of the Governor.

*Senseramente,*

# Steven Carbullido

## Engineer

**Qualified:** B.S. Environmental Engineer / University of California, San Diego / 2014

**Connected:** Society of American Military Engineers

**Professional Summary:** Steven has four years of construction management experience on environmental-related projects. His recent work experience includes landfills, wastewater treatment plants, and drone work. Steven is resourceful and flexible, able to adapt to changing priorities and maintains a positive attitude, has a strong work ethic and strong people skills. He communicates effectively with project team members and creatively develops procedures to streamline efficiency and reduce project costs.

### Staff Engineer

#### **Ordot Dump Closure | Gershman, Brickner & Bratton | Ordot, Guam | 2014 - 2016**

Steven observed, documented, and inspected the contractor's activities throughout construction. This included 5,000 linear feet (LF) of leachate collection lines; 3,000 LF of sewer and stormwater pipes; 8,000,000 square feet of Geosynthetics for the waste cap system; various stormwater and leachate storage ponds, leachate storage tanks, a gas collection system, and a sewer pump station.

Steven reviewed and coordinated responses to submittals & requests for information, issued design clarification memos, transcribed meeting minutes weekly, reviewed contract change requests, designed grading plans, and managed the MIS portal (Bentley's ProjectWise, formerly known as EADOC). This was a high profile project under a court ordered consent decree, and it finished to the client's satisfaction on schedule, within budget, and with no lost time accidents.

Upon project completion, Steven submitted GHD's work on the project for three awards. GHD was awarded: The Construction Management Association of America's 2016 Infrastructure Project of the Year (Construction Value Less than \$50M Category); Bentley System's Year in Infrastructure Special Recognition Award for Advances in Construction Management; and Construction Management Association of Korea's Recognition Award at their 4th International CM Conference.

### Assistant Project Manager

#### **Agat-Santa Rita Wastewater Treatment Plant | Guam Waterworks Authority | Agat, Guam | 2016 - Present**

Steven observed, documented, and inspected the contractor's activities during construction for a new secondary wastewater treatment plant. This included

Oxidation Ditches, Clarifiers, Aerobic Digesters, a Dewatering Centrifuge Building, Equalization Tank, Headwork's, Lift Station, an Ultraviolet Disinfection Building, and sanitary sewer and waterlines. Steven reviewed submittals, payment applications, contract change requests, schedules, and delay claims. He transcribed meeting minutes, and managed the project MIS portal. The project had a tight court ordered deadline and required extensive documentation to analyse the contractor's delay claims and showcase how the contractor's progress compared to the phase deadlines. During the final year of the project, due to staffing patterns and budget constraints, Steven successfully managed the project with minimal oversight.

### Staff Engineer

#### **Northern District Wastewater Treatment Plant | Guam Waterworks Authority | Dededo, Guam | 2018 - Present**

Steven spearheaded various pre-construction tasks, including scope and fee development, implementation and customization of the MIS portal for the Client's program, design review, and organization and revising of quality assurance forms for use during construction.

### FAA Certified UAV Pilot

#### **Various Projects throughout Guam & Northern Mariana Islands | USA | 2014 - Present**

Steven is a certified Unmanned Aerial Vehicle (UAV) pilot with the FAA. He has flown various UAVs for projects, including landfills; wastewater treatment plants; roads; commercial buildings; solid waste transfer stations; water tanks; and piers, for inspections, photo and video documentation, business development, and client satisfaction.

Steven is the lead remote pilot for the Pacific Group and is in charge of obtaining clearance from the FAA for flights in restricted airspace, conducting site safety assessments,

**Steven Carbullido**

equipment inspections, and completing flight logs. Steven's UAV work has been printed in various publications, including Engineering News-Record (ENR) Magazine, The Pacific Daily News, and The Guam Daily Post. Steven has collaborated with team members to create videos using UAV footage for clients to showcase at their conferences.

**Lead MIS Manager**

**Bentley's ProjectWise, formerly known as EADOC | 2014 - Present**

Steven manages Bentley's ProjectWise, an MIS portal, that is used throughout the Pacific Group on all construction management projects. It is the portal where stakeholders from around the world view, forward, respond to, and process all project documentation (such as RFIs, submittals, document revisions, reports, project correspondence, etc) in real time. GHD's success with the system has led to clients tasking Steven to manage, customize, and provide support for their ProjectWise systems for their own programs. Steven leads trainings for contractors, owners, consultants, and other stakeholders on all projects across various timezones.

**Other related areas of interest**

**Recognized (Certifications/Trainings)**

- UAV Part 107 Certified Remote Pilot
- ACI Concrete Field Testing Technician – Grade 1
- American Red Cross CPR, AED, First Aid

# Jailed Reuters reporters, US border photographers win Pulitzer Prizes

NEW YORK (Reuters) — Reuters won two Pulitzer Prizes on Monday, one for revealing the massacre of 10 Muslim Rohingya men by Buddhist villagers and Myanmar security forces, and another for photographs of Central American migrants seeking refuge in the United States.

The awards marked the second year in a row that Reuters has won two Pulitzers, the most prestigious prize in American journalism. Reuters has won seven since 2008.

Two of this year's honorees have been jailed for 490 days in Myanmar for their role in uncovering the killings.

"While it's gratifying to be recognized for the work, public attention should be focused more on the people about whom we report than on us — in this case, the Rohingya and the Central American migrants," Reuters Editor-in-Chief Stephen J. Adler said.

In other categories, coverage of mass shootings in the United States and investigations into President Donald Trump featured prominently. The New York Times and the Washington Post also took two Pulitzers each.

Reuters and the Associated Press were both awarded prizes for international reporting, with the AP winning for its coverage of war atrocities in Yemen.

The Reuters award was for an investigative report that revealed the massacre of 10 Rohingya at the village of Inn Din, in the heart of the conflict zone of Rakhine state in Myanmar.

**JAILED:** Detained Reuters journalists Wa Lone and Kyaw Soe Oo arrive at Insein court in Yangon, Myanmar, Aug. 27, 2018. Myo Kyaw Soe/Reuters

Two young Reuters reporters, Wa Lone and Kyaw Soe Oo, both Myanmar citizens, found a mass grave filled with bones sticking out of the ground. They went on to gather testimony from perpetrators, witnesses and families of victims.

They obtained three devastating photographs from villagers: two showed the 10 Rohingya men bound and kneeling; the third showed the mutilated and bullet-ridden bodies of the same 10 men in the same shallow grave.

In December 2017, before Wa Lone and Kyaw Soe Oo could complete their story, they were arrested in what international observers have criticized as an effort by authorities to block the report. The report, "Massacre in Myanmar," was completed by

colleagues Simon Lewis and Antoni Slodkowski and published in February of last year.

In September, Wa Lone and Kyaw Soe Oo were sentenced to seven years imprisonment for violating the country's Official Secrets Act.

"I'm thrilled that Wa Lone and Kyaw Soe Oo and their colleagues have been recognized for their extraordinary, courageous coverage, and our photojournalists for their moving pictures that show humanity defying huge obstacles," Adler said. "I remain deeply distressed, however, that our brave reporters Wa Lone and Kyaw Soe Oo are still behind bars."

## Assange, Manning had reason to believe leaks would injure US

WASHINGTON (Reuters) — WikiLeaks founder Julian Assange and former U.S. Army intelligence analyst Chelsea Manning had reason to believe that leaking U.S. military reports "would cause injury" to the country, federal prosecutors alleged in a newly unsealed court filing on Monday.

In the affidavit submitted to federal court in Alexandria, Virginia, prosecutors said U.S. military reports from the wars in Afghanistan and Iraq included information about the "identity and significance of local supporters of U.S. and allied forces in Afghanistan."

When U.S. forces raided the compound in Pakistan where Osama bin Laden was hiding out, for example, they found a letter that showed the al-Qaida leader was interested in copies of Pentagon documents published on WikiLeaks, the prosecutors said.

According to prosecutors, leaked reports on the Afghan war included information on militants' improvised explosive device designs and attacks, including details of U.S. and coalition countermeasures against such home-made explosive devices and their limitations.

FINEGAYAN ELEMENTARY SCHOOL	
FAMILIES AND TEACHERS EMPOWERED (FATE/PTO)	
SY 2018-2019	
STATEMENT OF FINANCIAL OPERATIONS	
(OCTOBER THRU DECEMBER 2018)

## Office of the Mayor

April 15, 2019

The Honorable Sabina Flores Perez  
Senator and Chairperson  
Committee on Environment, Revenue  
& Taxation and Procurement  
194 Hernan Cortez Avenue  
Hagatna, Guam 96910

Hafa Adai Senator Perez:

I write to you in support of Mr. Steven Carbullido's nomination to the Guam Environmental Protection Agency Board of Directors.

Mr. Carbullido was born into a hardworking and intellectual family. He was raised with good moral values and has proven to live by those very examples as evidenced by his education, career and social life. His philanthropic commitment to our community and our church demonstrate his concern for humanity. I am proud to say that I have known Steven since birth and have always been excited to hear about his achievements.

With the challenges our island faces relative to the protection of our precious resources, the ability to control invasive species, the lack of an island-wide green waste management plan and obstacles to recycling, to name a few, Mr. Carbullido will undoubtedly offer the necessary expertise and leadership that our local agency needs to work toward resolving these issues. Confirming Mr. Carbullido to the composition of this Board will provide knowledge, expertise, fairness and good governance to the protection of our people, land, sea and sky.

Si Yu'os ma'ase' in advance for your kind consideration and favorable confirmation!

Sincerely,

  
JESSE L.G. ALIG  
Mayor of Piti

Telephone: 671.472.1232/3 Email: [jesse.alig@pitiguam.com](mailto:jesse.alig@pitiguam.com) P.O. Box 786 Hagatna, Guam 96932

April 23, 2019

The Honorable Sabina Flores Perez  
Senator and Chairperson  
Committee on Environment, Revenue  
& Taxation and Procurement  
194 Hernan Cortez Avenue  
Hagatna, Guam 96910

Dear Senator Perez:

I am writing to express my support for Steven Carbullido appointment to the Guam Environmental Protection Agency's (GEPA) Board of Directors. Steven has been a Staff Engineer in our GHD Guam office since 2014 where he has excelled and exhibited the highest levels of honesty and integrity in his day-to-day decision making and interaction with clients, regulators, government agencies and stakeholders. I know that he will be an excellent Board member for GEPA. I state this based on his previous actions, and experience along with the level of knowledge and training he has in environmental issues. These characteristics will help him contribute to improving the quality of our environment throughout the island.

As a Staff Engineer with our firm he has worked on a number of environmental related projects that give him unique insight and understanding into the issues surrounding protection of our environment on Guam. These include such noteworthy environmental protection and mitigation projects as the Ordot Dump Closure and the almost completed Agat Santa Rita Wastewater Treatment Plant project. Through these projects, he has become extremely familiar with Guam's environmental regulations and the challenges we all face to achieve a clean, safe environment for all of the island's residents and visitors. The Guam EPA's Mission Statement espouses:

"The Agency's framework is designed to facilitate the improvement and maintenance of a high quality environment at all times, to guarantee an enjoyable life for the people of Guam at present and in the future and to ensure that environmental degradation of the quality of land, water and air by any pollutants, including all physical, chemical and biological agents, should not be allowed."

Steven is in a unique position to bring a set of youthful, intelligent and sound ideas to the Board and the agency overall that will surely contribute to accomplishing the intent of the Mission Statement.

I am confident that Steven will be an asset and bring a fresh perspective to GEPA's Board as it sets and administers policies to protect our island's valuable natural resources and improve environmental quality for our residents.

If you have any questions please feel free to contact me directly at [Paul.baron@ghd.com](mailto:Paul.baron@ghd.com) or 671-472-6792.

Sincerely,

A handwritten signature in black ink that reads "Paul K. Baron". The signature is fluid and cursive, with the first letters of each word being capitalized and prominent.

Paul K. Baron, P.E.  
Principal

## OFFICE OF SENATOR SABINA FLORES PEREZ

Chairperson

Committee on Environment, Revenue and Taxation, and Procurement

*I MINA TRENDAI SINGKO NA LIHESLATURAN GUAHAN*

35<sup>TH</sup> GUAM LEGISLATURE

### COMMITTEE REPORT DIGEST

#### I. OVERVIEW

The Committee on Environment, Revenue and Taxation, and Procurement convened a public hearing on April 19, 2019 at 1:00 p.m. in *I Liheslaturan Guahan* Public Hearing Room. Among the items on the agenda was the consideration of the appointment of Mr. Steven Philip Carbullido to serve as Member, Board of Directors Guam Environmental Protection Agency, whose appointment history is as follows:

- Appointed by Governor Lourdes A. Leon Guerrero on March 22, 2019, for Three (3) years from date of Confirmation.
- Appointment packet forwarded to *I Liheslaturan Guahan* on March 25, 2019
- Appointment packet forwarded to this committee for public consideration on March 26, 2019

#### Public Notice Requirements

Public Hearing notices were disseminated via email to all Senators and all main media broadcasting outlets on April 12, 2019 and again on April 17, 2019. Publication was conducted in the **Guam Daily Post**, a newspaper of general circulation, fulfilling the 5-Day Notice and 48 Hour Notice of the Open Government Law requirements respectively.

#### Senators Present

Senator Sabina Flores Perez

*Committee Chairperson*

Senator Therese M. Terlaje

*Committee Vice Chairperson*

Senator Telo Taitague

*Committee Member*

The confirmation hearing for **Mr. Steven Philip Carbullido** commenced at 1:00 p.m.

#### II. SUMMARY OF TESTIMONY AND DISCUSSION

Chairperson Perez called up all Guam EPA Board of Director nominees together and those who have signed up to testify.

**Steven Carbullido**, *Nominee, Member, Guam Environmental Protection Agency Board of Directors*: Madam Chairperson Senator Sabina Perez, Senator Telo Taitague, *Håfa adai* I am Steven Carbullido and I humbly sit before you today as a nominee to our islands Environmental Protection Agency's Board of Directors. A little about myself. I was born and raised in the village of *Piti*. After high school I moved to California to pursue a degree in Engineering, and upon graduation I returned home and started my career as an environmental engineer, a staff engineer at GHD Guam, formerly Windsor and Kelly. I have worked on a variety of projects to improve environmental quality and efficiencies throughout our island. I was a member of the construction management team that facilitated the closure of the *Ordot* dump and the associated environmental cleanup of the surrounding area. I worked closely with the contractor, engineer of record,

government agencies and various stakeholders to ensure compliance with the US District Court of Guam's consent decree and federal and local environmental laws and regulations. This was a high-profile project with significant government, public and media scrutiny, which our team completed to the client's satisfaction on schedule within budget and with no lost time accidents. I interacted and coordinated with the key stakeholders on the project, including the US Attorney's Office, the District Court of Guam, the federal receiver, the *Ordot Chalan Pago* mayor's office, GWA, GPA, DPW and USEPA. Over the course of the project, I developed a professional relationship with these agencies and key stakeholders and believed that I earned their trust and respect, as a result of my work performance. Upon completion of the *Ordot* dump closure my next project was to serve as the assistant project manager overseeing the construction of the *Agat Santa Rita* wastewater treatment plant. This project was also under court order for wastewater quality compliance and during the final year I handled greater responsibilities and managed the project with minimal oversight.

My education as an environmental engineering major from the University of California, San Diego exposed me to the related technical theory, its applicability and real-world solutions for environmental issues related to renewable energy, water, transportation and air quality. My studies included fluid mechanics, heat transfer, thermodynamics, probability and statistical methods and programming for engineering analysis, among other courses. My education and project experience have provided me with a solid foundation and have prepared me for a career in civil and environmental engineering with a focus in waste water and solid waste. In addition to my professional work, I am actively involved in the Society of American Military Engineers and the village of *Piti*, supporting events hosted by our Mayor's Office and local church. Through my volunteer efforts I am constantly reminded of our indispensable natural resources and the importance of preserving and protecting our environment for future generations to come. Madam Chairwoman and members of the Legislature, I thank you for the opportunity to testify before you. I believe that my professional experience and education will be an asset to the Guam EPA board as it sets and administers policies to protect our islands valuable natural resources and improve environmental quality for our residents. A son of Guam, I have a deep appreciation for our land, our water and our air. I understand well the challenges contractors and designers face in their differing roles on environmental projects. I aspire to hold my ethics to the highest standards and if confirmed, I commit that I will be an impartial voice and bring a fresh perspective to the Guam EPA board. I look forward to the opportunity to contribute to our island and affect positive change as a member of the Guam EPA board. thank you and I humbly ask for your support. *Si Yu'os ma'åse'*.

**Chairperson Perez:** Thank you so much. So yes speaking of mandates, the mandate of Guam EPA and its board is to ensure a high quality environment to be maintained at all times, to guarantee an enjoyable life for all people at present and in the future and that environmental degradation of the quality of land, water and air by pollutants including all physical, chemical, biological agents should not be allowed. So, to this end it is the purpose of this act to provide a united integrated and comprehensive territory-wide program of environmental protection and to provide a framework to fulfill that task. And yes, as you mentioned the board members are very important. Its presence, it's important that they meet quorum, there are consequences when quorum is not met and so that's why it's important that, I'm glad to see that the governor has nominated a complement, full complement of board members with diverse backgrounds I must

say and long backgrounds too. So, I just want to basically open up, oh sorry we have more testimony. So, Steven Carrara, if you want to speak. I know you signed up in support of Steven Carbullido, Miss Florida Sanchez, Robert Perron.

**Steven Carrara**, *Member, Guam Environmental Protection Agency Board of Directors*: Yes, so thank you and good afternoon. I've been on the EPA board for several years; it's been rewarding and have appreciated the opportunity to contribute to the community. I really have great respect for the way EPA is run under the leadership of Walt and Bob at the board. It's a real community and there's a lot of interaction and you can feel it when you go to the board meetings. And I think EPA is doing a great job and I think we will do even better things. Bob's been a great Chairman, we've had frank discussions at the meeting, and we had a lot of participation. Florie's been on the board for several years and always appreciated working with Florie on it. Again, everybody participates, and I believe would have a great mission. And Steve and I, well we've been friends for a while. I know his employer and he spoke very highly of Steven. We all know his family and good, solid people and we welcome his expertise on the board. I know he's worked on the landfill closures, Puerto Rico and *Ordot*, so we look forward to his participation. Monica I just met her yesterday, but she jumped right into the board meeting. I didn't sign up to speak to her because I don't really know her, but I could tell she's going to be a great contributor as well. So, thank you very much.

**Chairperson Perez**: Thank you so much Mr. Carrara. Administrator Walter Leon Guerrero.

**Walter Leon Guerrero**, *Administrator, Guam Environmental Protection Agency*: Good afternoon Senators my name is Walter S. Leon Guerrero, I'm the Administrator at Guam EPA. I'm here to speak on behalf of the four board nominees that the Madam Governor has selected and appointed to be before you. First, I'd like to talk about as you mentioned Senator Perez that our board, Guam EPA board is very important to the procedures that Guam EPA does. In short if NOV is issued and there's a contesting to that NOV and if we don't have quorum and abort it does not matter. Basically, the potential violator can, the NOV is wiped clean and currently with Bob and Florie's a term being up we do not have quorum. It is the fastest that, necessity that and if it's that we man our board to the fullest possible. I'm glad we have four nominees. I've been in this position for about two years and eight/nine months and I've worked with Florie and Bob during the 16 years that they've been on the board. I know a lot of the things that they've done and the work and effort in time that they put in to ensure that Guam EPA maintains its efficiency and to manage and oversee the environment of Guam and the people of Guam. I know Mr. Carbullido and the work that he's done on some of the consent decree and stipulated orders so that speaks well of itself. I myself I don't know Moneka as well but in yesterday's board as was stated, there is an issue that she thought was not appropriate and she made sure everybody knew what her, the feelings were and that can only add some a greater respect to making sure that we cover everybody's views and passions for the environment and for the island of Guam. Again, I support all four, I look forward to them all being part of the board because again it is the wide variety of expertise that they bring to the table will definitely help Guam EPA maintain the status of being a lead agency in the government of Guam. Thank you.

**Chairperson Perez**: Thank You Mr. Leon Guerrero.

**Chairperson Perez:** Thank you so much. I'm not familiar with you if you can...

**Ann Roth, Member, Guam Environmental Protection Agency Board of Directors:** My name is Ann Roth, good afternoon Senators. I'm a member of the on the board of directors of EPA, have been for over six years. I was here to testify in support of Bob and Florie, they were on it, they've been on for many more years before me. Bob is consistently at meetings and so he's not the reason we may lack a quorum. It has been great working with them, they're both knowledgeable people and I do want to say I do support them continuing on. I don't know personally know Steven or Moneka but it's great to get the youth in it, in the on the board. I'm sure they have their own ideas and we can work with that. Thank you.

**Chairperson Perez:** Thank you so much Ms. Roth. Ms. Taitano would you like to testify?

**Conchita Taitano, President, SWANA Pacific Basin Chapter:** Yes, I would thank you Madam Chair, members of the 35<sup>th</sup> Guam Legislature. My name is Conchita Taitano and I sign leave for today for a couple of reasons, was because I'm going to go to Mass afterwards, but the other reason is to offer my support for the board, for the nominees today. I come to you not as a member of the Guam Environmental Protection Agency. I come before you as the president of the SWANA Pacific Basin Chapter. Bob Peron is the treasurer and secretary for this organization. I offer my support because Bob really does care about building capacity with respect to waste management on island. As an example of that is the upcoming Pacific Islands Environment Conference that's scheduled for June. We are bringing these pre-conference workshop, SWANA pre-conference workshops at one third of the price that they would normally charge if you attended this course, the same course in the States and that was done not because of me, it was really because of Mr. Perron and his close relationship with the national organization in DC. I also like to offer my support for Florie Sanchez. Florie has been with the agency for a long time. She provides, she also provides that continuous thread for the Board of Directors. I do not personally know the two new nominees, but I can tell you that I know Mr. Carbullido's parents and they're excellent people and chances are their children, their son is just as excellent. He also brings to you, brings to the board a wealth of experience aside from his youth. I know Moneka. I spoke to her very briefly but let me tell you that's one thing that I think the... When we take care of the environment we always talk about cleaning and enforcement, all these things that are normally associated with the organization. What people don't realize that they do not take into account is culture and I believe that's what Moneka can bring into the board. Because the protection of the environment, the protection of the land is directly related to the culture of a people and that in itself is well, it speaks for itself. In closing the two new nominees, the young paired with the young at heart only leads to what we know as succession. Excellent succession planning. Thank you very much.

**Chairperson Perez:** *Si Yu'os ma'àse'*. I would like to also acknowledge the presence of my colleague Senator Therese Terlaje thank you for being here today. We're now at this point actually, would anybody else would like to provide testimony on behalf of the nominees? Okay so at this point I would like to open up the floor to my colleagues for questions to any of the nominees here today. Starting with Senator Taitague.

**Senator Taitague:** Thank you Madam Chair and thank you to all the nominees for stepping up to the plate. Actually, you hit it on the nose with regards to Conchita, when you mentioned he's at

every, or no miss Roth, when you mentioned that he's at every board meeting, one of you guys said that. That's very important when you sit on these boards that you do attend the meeting but, most especially to have additional time out of your already busy schedule to really look into the issues and find solutions to bring to the table. That's something I'm hoping to get your commitment and as I look at all four of you. I have that commitment you will show up on the board meetings, right? That's number one, number two would probably be you know, I appreciate the fact that now we have some youth to the board, that's going to be very helpful. And Moneka I've known you since you're graduating from high school and your passion with everything from the culture and now to the environment. I have immense confidence that you will speak your mind because I've met you and you're like me, well speak on what's on our mind, no host you'll do it. Thank you for stepping up and please be there at the meetings. Bob we've known each other as well for so long and I'm so happy to hear that you've decided to continue on. I kind of got wind that you might want to retire you know from this but I'm glad you're stepping up because you have that historical knowledge at EPA and all the work that you've done, so thank you so much. Florie, I've met you as well I really appreciate all the work that you're doing at EPA. And Mr. Carbullido, thank you I was hoping you would actually work for EPA instead of GHD. The amount of knowledge that you have you would be a great asset at EPA but if we can take you in this capacity then we'll take that. The only concern I have is just a conflict of interest you know so if they're... Mr. Carbullido this is to you because I know Bob has that situation before and he addresses it in a certain way but because your company, the company that you work for, if there is a conflict of interest, you know information and you have at EPA that other companies don't have, how are you going to deal with that?

**Mr. Carbullido:** Yeah it is my understanding, that the company I work for, we don't have any contracts with Guam EPA. Typically, I've interacted with EPA on-site inspections for construction projects. We route documents through DPW for permitting. I don't foresee there being a conflict of interest and if there is one, I will certainly recuse myself.

**Senator Taitague:** Okay I thank you. I know your parents too. They raise good kids. Thank you so much for stepping up to the plate and thank you Madam Chair.

**Chairperson Perez:** Thank you so much Senator Taitague. Senator Therese Terlaje do you have any questions?

**Senator Terlaje:** Thank you all. Sorry I was a little late, I was trying to listen on my way here on the YouTube, but do you mind Mr. Carrara, what is your interaction with the board? It sounds like you have a lot of interaction, are you a board member? Okay that's why I wanted to make sure you didn't... All right well thank you then for your service. We have two other board members here and then the ones who are being reconfirm. Great thank you very much. I just, that's good too because I wanted to talk about the prior board's actions, and I have a few concerns of EPA. Of course, I want to praise EPA because I do think that they are doing some very good things and I think they've got good leadership and the board I am very glad that that you both are again joining the board. I want that good work to continue. I was just concerned that while they were finalizing the rules and regulations on the Recycling Revolving Fund and EPA was doing that, that there was efforts and the Legislature to remove those funds from the purview of EPA and really direct them elsewhere. I don't believe that those efforts are, have gone away. I think that they may still, they

may be revived and just because you know their funds and everybody's looking to use funds in different ways. But I guess I wanted to just hear from the board members. What do you believe those funds, do you believe that you should protect them for the use of the new rules and regulations and the Recycling Revolving Fund or that it's okay if they are diverted, I guess to other places?

**Mr. Perron:** Can I take that Senator? Yeah, those funds really need to be protected and that's why it's so important that we get these rules and regs for the RRF completed and put into place. I know the staff is working diligently with the in-house attorney and the Attorney General's Office to make a few final tweaks to it and then working with Senator Perez's Office on some potential legislation. You know we're actively pushing it very hard and very fast and in fact we've recessed our last board meeting and we're going to call a special meeting to vote on the updated rules and regs that we have to tweak a little bit, to satisfy some legal requirements. The board is very much in favor of getting them in place as soon as we can to make sure those funds are used properly for their intended purpose which is for the environment and to further the recycling industry on Guam.

**Senator Terlaje:** So, thank you. Ms. Sanchez did you want to add anything today?

**Ms. Sanchez:** In the beginning the funds were not allocated or to be directed by Guam EPA but once it was directed to them, they took great responsibility in ensuring that the intent of it is afforded. I just, I respect that they are taking care of the funds as best they could or as its intent is to help our environment and, but we definitely are in the process of finalizing the rules and regs. They do want to have it as clean as possible so that it is relayed in the law what the full intention is and how to operate the funds.

**Senator Terlaje:** Thank you. Yeah for those who are new members, just a little bit of background is that when the, before the rules and regulations are in place, pretty much the Legislature has in different budget cycles taking the money and assigned it to Mayor's for their recycling purposes and other areas. And so, I yeah, they do have plans now in their rules and regulations of how to use these funds for of course recycling. And so, I just think that the employees they have done a very good job, but they need the board's support and they need the board to be very consistent about that and not to say it's okay. And not to allow any of the employees to say it's okay if we divert those even temporarily. You know that you have to really show very consistently to the public, to the Senators, that you have your plan, you are intent on getting that in place as soon as possible. I am just recommending to the Chair that that really should be in place before the budget cycle comes around because it's going to be a problem if it's not.

**Mr. Perron:** Senator it's got a big target on it but sitting there as unobligated funds. So that's why it's so important that we get those obligated and put to use in the way that the law intends it to be used.

**Senator Terlaje:** Right and because this we've all heard it one of the biggest complaints on Guam is you know littering and we have no recycling program, that I mean you know very... They're criticizing our efforts in this regard but I for a fact know that EPA is, they've got the most competent people. I just think you have to; you have to let them shine; you have to you know guard from them everything else so that their efforts will indeed be the prevalent efforts on Guam. I

guess, I just wanted to ask, and I love the transparency. I see that you're going to try to do electronic, you said electronic board meetings. Yeah, I work with the AG on that I'm not sure how clear that is but keep the transparency efforts. I think your agency is a regulatory agency, it's one you know even if they're not criticizing EPA, they're criticizing that nobody's doing what you're supposed to be doing right. And so, you just have to bring the public along and that's the way and you want their help. I'm pretty sure the employees want their help. A lot of the things that we found out about is because of people reporting, right, that they found this. You can't be everywhere, we know that, you're limited and so that's how we all work together. So please encourage their help, be as transparent as possible and let the efforts of your employee's shine. I mean bring them to the media, talk about it a lot. I say they're talked about too little you know. Very often we hear from EPA when there's a problem and they're responding to you know, their, what they had done. But I keep telling Walter brag about what you guys are doing because the public needs to have confidence that you are doing everything possible to protect our environment. Otherwise they're going to believe the opposite right. So, I'm, I don't know it's a little bit of PR which is not really your job but push the PR right and just push in your board meetings and at every opportunity you get that all the, all the efforts of EPA and especially your transparency.

I guess I wanted to just ask do you think that any more can be done, these are for the new members, to ensure that Agent Orange or other contaminations on Guam, that they can be removed or that their effects can be fully addressed? Mr. Carbullido?

**Mr. Carbullido:** My knowledge on specifically, the Agent Orange issue is what I read about it in the news. I know efforts are underway to, we're sampling them and seeing the levels of what's in the soil. I'm not entirely familiar on the subjects but I definitely support sampling and seeing what is, what is on our island, if we do have it.

**Senator Terlaje:** There's other places around that we know that are contaminated and I'm sure EPA is kind of the holder of a lot of this knowledge but the people of Guam, like me, we kind of know that there is that contamination for example PCBs in certain areas and other elements in other areas. But we're not exactly sure. We're trusting that somebody's on top of it, but I guess, I would just ask the new board members to be sure that EPA is on top of it. That we're not just totally relying on another federal agency to report when they decide to report. That you're leading in this, I think the Agent Orange would never have happened if you know, Walter didn't push that with them and the in fact maybe not even if the veterans didn't themselves come forward and really make a big public ordeal about it. Right and so that's why I'm asking you as new board members that you can do that, that can be a role. There are so many mandates of EPA. You can pick one and let it be your, you know you be the champion of it. I'm sure that they could use that kind of help and that you don't let that become low on the priority list just because you're focusing on it, well while they're focusing on you know putting out the fires right. There are so many things. Moneka?

**Ms. De Oro:** Yes, I hope that everyone and you especially in the Legislature can know and count on me to be a voice that is very critical of all the actions that have taken place in our island and the actions that will be taking place in our island. I have been an advocate for the de-militarization of our island for a very long time specifically because of the contamination associated with militarization of our lands and of the past military action and the impact it's had on our birds, on

our bodies, on our minds, on our soil. It is definitely something that I think that we need to step up our game and in all ways that we can to hold those in power accountable to speak truth to that power. We have ridiculously high rates of cancer and other NCDs that are direct result of that, the contamination that you speak of. We do need to step up our game in enforcement, in testing and sampling. I do think that it's an injustice for people to have the environmental agent, protection agency not have a home, not have a building that they call their own. I think that's something, that's in the five-year work plan and I support the efforts to build a state-of-the-art home the for the Environmental Protection Agency, where we could conduct these sorts of community outreach programs as well as all the other program mandates that the agency holds. But yes, I will be someone that the Legislature can count on to ensure that the quality of our environment and all of the different contaminants are a counted for and then those who violate any sort of laws or even in the past. I don't know how we would be able to do that but if we could make sure that we hold the military accountable for all that retribution, reconciliation or whatever the avenues are to do that. Because it's evident in our bodies that we're not in a healthy place right now.

**Senator Terlaje:** Well my goal is that by using the knowledge that EPA has accrued over the years that we are able to pursue various avenues of cleaning up and for example with the Agent Orange one of the goals is to get these veterans the health care that they need because of the exposure. And that's the case with other contaminations to, it's not just to point the finger but it's really to get what they might be able to get if they are suffering from exposure to any contaminants that I think is the ultimate goal. And so that's why and I really believe. I worked at EPA just for one year many years ago when I was right out of college and it was probably the most eye-opening experience of my life. I loved everybody there and what they did. I especially, I just thought the water division was the coolest because they were going into places of Guam to sample rivers and different places and you know along the coast that we didn't normally have access to, or we just didn't go to normally. So, they were really out there, and I think you know developing that program in those days and it was so exciting. I know that they've just got years and years of expertise knowledge and so your board members, your role and my role, we all have different roles but we're all supposed to help them to get all that hard work that they have been doing to just be shared with the people of Guam. Because somebody's going to come up with an even better idea than any of us have right now right. If they have the facts and if they have the knowledge that they need and that's why I appreciate your transparency efforts and appreciate your willingness to serve on the board. So, thank you all very much. Thank you.

**Chairperson Perez:** Thank you so much Senator Terlaje. I would be remiss if I didn't include this comment. We got a call from Mayor Louise Rivera as she called to provide us. She's in full support of the appointment of Bob Peron and because he has helped the whole island with his efforts and he's a great asset and serves well on the Guam EPA Board. I forgot to mention that earlier. Yes, Guam EPA is going through some huge changes and pretty exciting changes. I think if you look at the five-year plan and all the changes that are that are occurring with their regulations. Like Senator Therese Terlaje very much focused on the water issue here on Guam because it pretty much all our contaminants end up there eventually. I know they're updating the Safe Drinking Water Act and I'm looking forward to working with the Administrator to strengthen the standards for us here on Guam and also looking at you know how our hazardous wastes are being handled you know, whether we can strengthen our laws here to protect the health of our community. The task is huge you know and there you never, there's so much to do here on Guam, when it comes

to the environment. I'm really thankful that you have accepted the nomination to be on the board. We look, I look forward to working and collaborating with you all.

And so I would just like to announce before we end the hearing, I will continue to receive testimony until 4:00 p.m. Wednesday April 24th and please address testimony to Senator Sabina Flores Perez, chairperson of the Committee on Environment revenue and taxation and procurement or it could be dropped off here or it could be emailed to [office@senatorperez.org](mailto:office@senatorperez.org).

Thank you so much for being here today and have a great Easter weekend.

Chairperson Perez then adjourned the confirmation hearing for **Mr. Steven Philip Carbullido**.

### **Written Testimony**

- Jesse L.G. Alig, *Mayor of Piti*
- Paul K. Baron, P.E., *Principal, GHD*

### **III. FINDINGS AND RECOMMENDATION**

The Committee on Environment, Revenue and Taxation, and Procurement finds the following on the appointment of **Mr. Steven Philip Carbullido**:

- Steven Philip Carbullido received overwhelming support for his nomination as a Member of the Guam Environmental Protection Agency.

The Committee on Environment, Revenue and Taxation, and Procurement hereby reports out the appointment of **Mr. Steven Philip Carbullido** to serve as a **Member** of the **Guam Environmental Protection Agency Board of Directors** with the recommendation to do confirm.

**OFFICE OF SENATOR SABINA FLORES PEREZ**
